

SHAJID SHAIK

QA Engineer | Manual & API Testing | Test Automation (Python, Playwright) | CI/CD

Narasaraopet, Andhra Pradesh | +91 6305061632 | shajidshaikjee@gmail.com | linkedin.com/in/shajid-shaik-012238371

PROFESSIONAL SUMMARY

QA Engineer with 1+ years of experience across the full Software Testing Life Cycle (STLC) — manual, functional, regression, and exploratory testing. Executes 80+ test cases daily across 3 products, runs structured 5-day regression cycles, validates 3-5 backend REST APIs per cycle using Postman, and logs an average of 22 defects per month in Jira with clear reproduction steps. Experienced with TestRail-based test management, Docker-based environment standardization, and CI/CD integration for continuous quality feedback. Building automation expertise in Python and Playwright. Domain background in automotive ADAS and EV systems.

TECHNICAL SKILLS

Testing: Manual, Functional, Regression, System, Smoke, Sanity, UI/UX, Exploratory Testing

Fundamentals: SDLC, STLC, Agile/Scrum, Requirement Traceability, SQL

Tools: Jira, TestRail, Postman, Git, Chrome DevTools, Grafana

Automation: Python, Playwright (in progress)

DevOps: CI/CD Pipelines, Docker

Domain Exposure: Automotive ADAS, Autonomous Vehicle AI, Electric Vehicle (EV) Systems

PROFESSIONAL EXPERIENCE

QA Engineer — Fast Deck Solutions (Client: Applied Intuition)

March 2025 – Present

- Execute 80+ manual test cases daily across 3 products spanning functional, regression, and exploratory testing.
- Run structured 5-day regression cycles per release, validating 3-5 backend REST APIs per cycle using Postman.
- Perform simulation and scenario-based testing to identify and isolate system behavior issues, applied within an automotive ADAS/sensor context.
- Design and maintain test suites in TestRail, ensuring full requirement traceability and coverage.
- Configure and manage Docker containers to standardize testing environments and reduce configuration drift across teams.
- Integrate automation scripts into CI/CD pipelines to deliver continuous quality feedback during development cycles.
- Log, track, and manage an average of 22 defects per month in Jira with detailed reproduction steps, improving developer turnaround time.
- Developing UI automation scripts using Playwright and Python; automated 5 regression test cases to date, reducing manual execution time.
- Collaborate with cross-functional engineering teams in daily stand-ups and sprint planning.

TECHNICAL PROJECTS

Electric Vehicle (EV) Modelling & Prototyping

- Designed and built a 1.5kW motor EV prototype to study drivetrain energy efficiency.
- Executed performance testing focused on battery discharge cycles and braking reliability.
- Analyzed electrical stability and heat dissipation data to optimize drivetrain performance.

EDUCATION

B.Tech, Electrical and Electronics Engineering — A.M. Reddy Memorial College of Engineering & Technology (2024 | 7.0 CGPA)

Diploma, Electrical and Electronics Engineering — A.M. Reddy Memorial College of Engineering & Technology (2021 | 76%)

CERTIFICATIONS

Python Programming • Full Stack Web Development • EV Technology • Salesforce Developer • Cybersecurity (Palo Alto Networks)
